No additional charges

This service has been tested and certified by eBusinessReady™ for interoperability.

EDS. Technology services. Business solutions.

We help clients improve their systems and processes so they can become more productive, manage change and grow.

Contact

Meeting complex challenges

In today's complex business world, clients need to interact with multiple trading partners that use various transactions formats (proprietary or standard); use various transport mechanisms such as the Internet, VPN, FTP, ISDN, e-mail, fax and X.25; have various levels of automation; and have disparate systems ranging from high volume processing mainframe to stand-alone workstations. Additionally, there is increasing complexity regarding security and privacy. Keeping up with this dynamic trading partner community is increasingly challenging for the individual company.

A sound strategy for connecting your entire trading community

EDS Business Exchange Connect Direct manages the sending, encryption, compression, routing and delivery of business transactions between trading partners' computer systems in a service bureau model. This frees your organization from having to keep up with technical issues, enabling you to focus on your business relationships with trading partners.

One-stop shop for all your e-commerce needs

EDS Business Exchange Services addresses all your e-commerce needs. We offer transaction-related services ranging from connectivity, translation and media conversion to extended archiving. We also offer trading community-related services such as trading partner management, and Web and PC-based supply chain management tools for smaller trading partners.

Responsive service

Providing excellent service to our clients is EDS' bread and butter. Our operations center monitors, troubleshoots and solves problems 24x7. We monitor individual account performance and make it visible to senior management and clients using our unique Service Excellence Dashboard.
