Advantages

- Rapid deployment
- Cost-effective
- Large installed base
- Single service provider
- Enhanced trading partner relations
- Global reach

This service has been tested and certified by eBusinessReady™ for interoperability.

Extend your EDI program to your global trading community

In today's complex business world, clients need to interact electronically with multiple trading partners that have various levels of automation, use various transaction formats (proprietary or standard) and use various transport mechanisms. On top of that, there is increasing complexity regarding security and privacy of communications. EDS Business Exchange Commerce PC is a suite of products and services that enables clients to exchange EDI and non-EDI business transactions with their small and medium-sized trading partners. Our services encompass migration, integration, PC software, connectivity and ongoing support. The results are faster communications, improved collaboration and increased efficiencies across your trading community.

One-stop shop for all your e-commerce needs

The EDS Business Exchange suite of offerings addresses all your e-commerce needs. For "hubs," we offer transaction-related services such as connectivity, translation, media conversion, extended archiving and trading community management in a managed service environment. For "spokes," we also offer EDS Commerce Web, a Web-based supply chain management tool for smaller trading partners.

Responsive service

Providing excellent services to our clients is EDS' bread and butter. Our operations center monitors, troubleshoots and solves problems 24x7. We monitor individual account performance and make it visible to senior management and clients via our unique Service Excellence Dashboard.

EDS. Technology services. Business solutions.

We help clients improve their systems and processes so they can become more productive, manage change and grow.
